

Deepanshu Chauhan

Greater Noida, India

+91-9548864851 deepanshu95488@gmail.com [LinkedIn](#) [GitHub](#) [LeetCode](#)

Profile Summary

Backend-focused Computer Science student with 500+ LeetCode problems (1550+ rating). Strong in data structures, algorithms, and system design, with experience building scalable, high-performance backend systems using Java, Spring Boot, and distributed architectures.

Education

Bennett University

B.Tech in Computer Science Engineering (CGPA: 8.33)

Aug 2023 – May 2027

Greater Noida, India

Coding Achievements

LeetCode

Ongoing

500+ Problems Solved — Rating: 1550+

- Solved medium to hard problems across arrays, trees, graphs, dynamic programming, and backtracking
- Strong pattern recognition in binary search, sliding window, recursion, greedy, and dynamic programming techniques

PROJECTS

URL Shortener Service

GitHub

High-performance URL shortening system with scalability and low latency

- Engineered a scalable URL shortener using Base62 encoding and Snowflake IDs generating millions of unique URLs efficiently
- Leveraged Redis caching achieving a 90%+ hit rate, reducing response latency under high traffic conditions
- Enforced rate limiting (Token Bucket) supporting 1000+ requests per second with secure JWT-based authentication
- Built an asynchronous analytics pipeline to process click events and user activity in near real-time
- Enhanced system throughput using concurrency handling, caching strategies, and optimized API design

Mystic India

GitHub — Live

Tourism exploration platform showcasing Indian culture, heritage, and destinations

- Built a full-stack tourism platform enabling exploration of 20+ Indian regions with structured content delivery
- Improved user engagement by optimizing navigation flow and interactive UI components
- Achieved 95+ Lighthouse performance score via code splitting and lazy loading optimizations
- Integrated AI-based content generation (Gemini API) to deliver dynamic and personalized recommendations

Experience

Smart India Hackathon (SIH '25)

2025

Participant

- Built **Mystic India** within a constrained hackathon timeline, delivering a working prototype with core features
- Executed feature development and optimized user interaction flows in a team-based environment
- Collaborated with a team of developers to deliver a complete solution under strict deadlines

Smart India Hackathon (SIH '24)

2024

Participant

- Proposed a solution to reduce carbon emissions in coal mining operations using analytical and optimization techniques
- Identified inefficiencies and suggested improvements to enhance resource utilization and sustainability
- Applied data structures, algorithms, and system design concepts to solve real-world industrial problems

SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript, SQL

Core: Data Structures, Algorithms, System Design, DBMS, Operating Systems

Backend: Spring Boot, REST APIs, Microservices, JWT

Databases: PostgreSQL, MySQL, MongoDB, Redis

Concepts: Distributed Systems, Caching, Concurrency, Scalability, Performance Optimization

Certifications

AWS Cloud Practitioner Operating Systems (Google) Linux System Programming Algorithmic Toolbox
